

THE CHALLENGE:
DATA-DRIVEN ASSESSMENTS

THE SPIN GLOBAL SOLUTION

Our mission is to disrupt disasters from neighborhoods to nations. Understanding the social and economic profile of a community substantially improves ability to prepare, mitigate, respond, and recover from disasters and helps inform our clients about which stakeholders are critical to bring to the table for a whole community approach.

FEATURED WORK

DUN & BRADSTREET | 2016-21

SPIN Global combined strategic consulting services, emergency management analytics, and econometrics to develop turn-key solutions for local, state, federal, and international clients.

METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS | 2016-18

SPIN Global conducted social and economic analyses of the District of Columbia and Prince William County to inform risk assessment, all-hazards, and incident-specific plans.

STATE OF NORTH CAROLINA | 2017-19

SPIN Global supported development of a Hurricane Matthew social and economic impact analysis to shape recovery policy decisions in the Governor's office and the Department of Public Safety.

FEDERAL EMERGENCY MANAGEMENT AGENCY | 2018-21

SPIN Global supported FEMA's Office of Business, Industry and Infrastructure Integration with development of the Platform for Understanding Lifeline Stabilization of the Economy (PULSE), and provided social and economic impact assessments for numerous response and recovery operations.

WHAT CLIENTS ARE SAYING:

"We were able to possess factual, data-driven information to assist the recovery team in making assessments and operational decisions for resources and funding."

- Mike Sprayberry, Director of North Carolina Emergency Management

CORE CAPABILITIES

- Data science
- Complex analysis
- Applied econometrics
- Online assessment management platform
- Resilience, response and recovery assessments
- Threat, hazard, risk and vulnerability assessments
- Systems design and integration
- Community assessment workshops

THE SPIN GLOBAL DIFFERENCE

We combine risk and vulnerability data from the natural, social, built, economic, and cyber environments to provide unparalleled decision support before, during, and after disasters.
